

Cookie Policy

Effective: August 3, 2026 · **Version:** 1.0 · **Document Code:** FLG-POL-005

What Are Cookies

Cookies are small text files stored on your device when visiting websites. They allow web applications to maintain session states, secure account logins, prevent malicious requests, and optimize platform navigation.

How We Use Cookies

FlutterGive uses cookies and similar tracking identifiers to:

- Maintain secure, authenticated user sessions and dashboard states.
- Prevent Cross-Site Request Forgery (CSRF) and secure forms.
- Preserve temporary donation and checkout session metadata.
- Remember preferred region, currency display, and language choices.

Categories of Cookies We Set

Category	Purpose
Strictly Necessary	Essential for user authentication, security validation, and processing active checkout/donation flows.
Functionality & Preferences	Stores regional settings, language choices, and user interface customization parameters.
Analytics & Performance	Monitors aggregate traffic, page load performance, and platform usage to optimize system reliability.

Category	Purpose
Payment Gateway Cookies	Set directly by licensed gateways (e.g., Flutterwave) during payment execution for card fraud detection and 3D-Secure verification.

Third-Party Disclosures & Consent Management

Third-Party Payment Processors: When making a donation or initiating a payout, external payment gateways may inject session cookies onto your browser to verify payment authorization and mitigate fraud. FlutterGive does not access or store these security cookies.

Managing Preferences: You can adjust cookie configurations directly in your web browser settings. Disabling strictly necessary cookies may prevent successful logins or cause payment checkout failures.

Contact

If you have questions regarding our use of cookies or technical security measures, contact our data protection team at privacy@fluttergive.com.
